Employee Attrition Analysis Report

Overall Attrition status

- The Company-wide attrition is **16%** (236 employees).
- Attrition is concentrated in specific departments, roles, and age groups, with strong links to job satisfaction.

1. By Department & Role

- **Research & development(R&D):** Records Highest attrition – **Lab Technicians (26%)**, **Research Scientists (20%)**.
- **Sales:** Records the second highest – **Sales Executives (24%)**, **Sales Reps (14%)**.
- **HR:** Records the lowest attrition at **5%**.

2. By Age Group

- **30–39:** is largest contributor with **42%** of turnover.
- **25–29:** represents 21% of the turnover.
- **40–49 & 50–59:** represents 24% and 12%.
- Minimal attrition in **18–24** and **60+** groups.

3. Job Satisfaction & Performance

- There is an average job satisfaction of **2.73 (low)**.
- HR has lowest attrition despite lower satisfaction score of 2.6.
- **Research & Development** (R&D) reports an avarage score of 2.7 and Sales Department shows an average score of 2.8, which is higher satisfaction but still has high attrition.
- High performance in **Sales** and **R&D** is leaving, signaling issues beyond satisfaction (e.g., career growth, pay, workload).

Key Recommendations

1. Focus on **high-attrition roles** (Lab Technicians, Sales Executives, Research Scientists).
2. Improve **satisfaction** in R&D and Sales.
3. Investigate **high-performer turnover** drivers.
4. Create **retention programs for 30–39 age group** (career development, tailored benefits).
